

Workshop formats facilitated by **theTeam.**

There are many reasons to take your research and collaboration sessions online. From reducing travel costs and environmental impact, to convenience and social distancing (thanks Covid-19); increasingly we've been hosting intimate, qualitative sessions remotely.

Huge advances in collaboration and conferencing platforms mean we've come a long way in being able to facilitate engaging and truly collaborative sessions with participants in multiple geographies.

Depending on your brief we have solutions to fit every challenge. Tailored sessions, ready to go, all lead by experienced and engaging facilitators.

Whether you're an organisation of 8,000 or 80,000, we can help unearth the insights that will connect you to your people and drive your projects forward.

Tools we use and recommend

miro

Endless online whiteboard for team collaboration

Whiteboarding software connects teams through video and live working.

Blank whiteboards or prepopulated templates for brown paper/post it activity, mind maps, experience mapping and strategy plans.

All participants can contribute to a facilitated session, adding notes online throughout.

zoom

Enterprise video messaging with live chat and content sharing

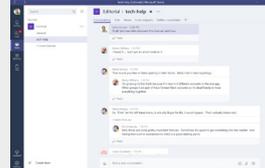

Easy to use online conferencing tool, available on any device.

Allows up to 1,000 participants, showing up to 49 videos in any session. Allows session recording and transcripts.

Built-in collaboration tools, permits multi screen sharing. Co-annotation and polling for interactive sessions.

Microsoft Teams

Our chosen space for team working

Teams along with Slack provides us and you with the perfect space to collaborate. Here we can share files and comments, and discuss developments in real time.

It can also be used as a collaboration tool post workshops to share final reports.

slido

Engage your audience with live polls

Visual polling allows the facilitator to ask questions, poll and analyse responses in real time. Compatible with Zoom, Skype, Webex, Google Slides, Slack, Vimeo and other collaboration and streaming platforms.

If you want to maintain existing systems your teams are familiar with, this can be integrated easily, providing live intelligence to steer the conversation.
